

# State of the Arctic Marine Biodiversity Report

# Table of Contents

---

<b>Key Findings</b> .....	<b>4</b>
<b>Advice for monitoring</b> .....	<b>6</b>
Coordination .....	6
Methods.....	6
Traditional and Local Knowledge (TLK) .....	7
Community-based monitoring networks and community relationship building.....	7
Knowledge gaps.....	7
Marine Expert Networks .....	8
Sea ice biota.....	8
Plankton .....	8
Benthos.....	8
Marine fishes.....	9
Seabirds .....	9
Marine mammals .....	9
<b>1. Introduction</b> .....	<b>11</b>
1.1 What is the Circumpolar Biodiversity Monitoring Program (CBMP) .....	12
1.2 What is the State of the Arctic Marine Biodiversity Report (SAMBR)? .....	12
1.3 What is the Arctic Marine Biodiversity Monitoring Plan (CBMP Marine Plan)? .....	12
1.4 Traditional Knowledge (TK) .....	13
1.5 Arctic Biodiversity Data Service (ABDS).....	13
1.6 Global linkages.....	15
References.....	17
<b>2. Setting the scene</b> .....	<b>19</b>
2.1 Arctic marine ecosystems .....	20
2.2 Physical drivers.....	21
2.3 Human drivers .....	24
2.4 Cumulative effects .....	27
References.....	30
<b>3.1 Sea ice biota</b> .....	<b>33</b>
3.1.1 Introduction .....	34
3.1.2 Current monitoring .....	38
3.1.3 Status and trends of FECs .....	42
3.1.4 Drivers of observed trends .....	46
3.1.5 Knowledge and monitoring gaps.....	48
3.1.6 Conclusions and key findings.....	50
Appendix 3.1.1: Meiofauna References .....	51
Appendix 3.1.2: Macrofauna References.....	53
References.....	57
<b>3.2 Plankton</b> .....	<b>63</b>
3.2.1 Introduction.....	64
3.2.2 Current monitoring .....	66
3.2.3 Status and trends of FECS.....	69
3.2.4 Drivers of observed trends .....	74
3.2.5 Knowledge and monitoring gaps.....	75
3.2.6 Conclusions and key findings.....	79
References .....	80

<b>3.3 Benthos</b>	<b>85</b>
3.3.1 Introduction	86
3.3.2 Current monitoring	87
3.3.3 Status and trends of FECs	95
3.3.4 Drivers of observed trends	100
3.3.6 Conclusions and key findings	103
References	104
<b>3.4 Marine fishes</b>	<b>109</b>
3.4.1 Introduction	110
3.4.2 Current monitoring	111
3.4.3 Status and trends of FECs	113
3.4.4 Drivers of observed trends	121
3.4.5 Knowledge and monitoring gaps	123
3.4.6 Conclusions and key findings	123
References	124
<b>3.5 Seabirds</b>	<b>129</b>
3.5.1 Introduction	130
3.5.2 Current monitoring	132
3.5.3 Status and trends of FECs	134
3.5.4. Drivers of observed trends	137
3.5.5 Knowledge and monitoring gaps	142
3.5.6 Conclusions and key findings	143
References	144
Appendix 3.5.1.	147
<b>3.6 Marine Mammals</b>	<b>149</b>
3.6.1 Introduction	150
3.6.2. Current monitoring	153
3.6.3. Status and trends of FECs	156
3.6.4 Drivers of observed trends	165
3.6.5 Knowledge and monitoring gaps	167
3.6.6 Conclusions and key findings	169
References	170
<b>4. Synthesis: Status and trends of Arctic marine biodiversity and monitoring</b>	<b>175</b>
4.1 Status and trends in Arctic marine biodiversity	176
4.1.1 Sea ice biota	177
4.1.2 Plankton	178
4.1.3 Benthos	179
4.1.4 Fishes	180
4.1.5 Seabirds	181
4.1.6 Marine mammals	182
4.2 Evidence for the impacts of drivers on Arctic marine biodiversity	183
4.2.1 Observed and expected impacts of climate change	183
4.2.2 Other major anthropogenic stressors	184
4.2.3 Links to non-Arctic ecosystems	185
4.3 The state of Arctic marine biodiversity monitoring	187
4.3.1 Adequacy of existing monitoring	187
4.3.2 Standardisation and harmonization of national monitoring schemes	188
4.3.3 Ecosystem-based monitoring – are we getting there?	189
